Service packages and licenses

Since version 1.4, it is distinguished between two firmware versions:

- The no longer maintained and published version **“base”**,
- As well as the version **“Standard”** (formerly pro), enriched with new and powerful features.

All the projects within a revision are offered both as **base** and **pro** version.

Base license

Since version 1.6 base versions and bootloader 2 are no longer maintained and supported!!!

Please ask here for upgrading to latest bootloader 4.

Installing base projects requires the installed Bootloader 2.

Standard license (formerly Pro)

The standard version requires an update to Bootloader 4.

An update to bootloader 4 is sent you by mail or is already installed when buying a Netzer from our distributors.
