Useful links

Our github account hosts some Netzer related projects like mdns_browser and the ldmicro branch.

Ladder diagrams

- **ladder** Article in Wikipedia.
- **LDMicro** from Jonathan Westhues. This tool is used since **version 1.5**, for executing small ladder diagrams by Netzer.

Tools

- **Bonjour for Windows** Bonjour service for Windows. Service for discovering (MDNS) Netzer and other devices in the network.
- **Avahi** Bonjour for Linux.
- **DNS SD** Bonjour Plugin for Firefox. For easy discovering Netzer in networks.
- **Wireshark** The swiss knife of Ethernet protocol analyzers.
- **Playcap** Simple replaying of Wireshark sniffs.
- **Hammer-Terminal** A terminal program. Among other useful features, the program offers the possibility to send and receive characters in ASCII, decimal, hexadecimal or binary representation.
- **com0com** Open source Null-modem emulator for Windows. **com2tcp** is included. It is for simple serial to socket communcication to access the remote Netzer serial port due virtual COM ports on PC side.
- **Hercules** This terminal program can be used for tests on GPIO server or serial server.
- **PUTTY** A further terminal program as an HyperTerminal alternative.

Netzer Projects

- **Sprinkler** from Bart Eversdijk. Automatic control of a sprinkler.
- **NETraction** from Daniel Nüsse. Controlling an LCD via Netzer.
