

# Netzer Playground - Simply develop Ethernet devices

The Netzer Playground enables quick development of circuits around the ethernet gateway Netzer from MoBaCon. Netzer is simply put into the prepared socket.

- Description and assembly manual: [Open](#)

The image shows a functional block diagram of the board.

The extension port has an important role. Depending on the application several extension boards can be put in the socket. Extension boards for **LCD** and **domestic** (relays, temperatur and light sensors, opto decoupled inputs) are under development.
